

# JUELL COLLIES

## Health Guarantee

The initial health of the puppy is guaranteed for three working days as determined by a certified veterinarian. It is highly recommended to have the puppy examined by a certified veterinarian within the first three days of ownership. If the puppy is found to be in unsatisfactory health resulting from conditions present at the time of purchase, the seller shall refund 100% of purchase price provided puppy and registration papers are returned to seller within three working days.

The puppy is guaranteed to be free of hereditary crippling/disabling defects visible by 12 months of age. Determination of what constitutes a hereditary defect is to be by the unanimous agreement of two (2) veterinarians agreeable to both parties. One of these veterinarians to be a tenured faculty member of an accredited university veterinary teaching hospital or Board Certified in the applicable specialty. Cost of the opinions are to be assumed by the buyer.

Guarantee is limited to either refund or replacement of the puppy with the next like available prospect or mutually agreeable animal provided the living dog and its registration papers are returned to seller within one month after discovery of said defect.

Prior to delivery, Canine Eye Registration Foundation (CERF) eye checks will have been performed on the puppies when they were between the ages of 6-8 weeks old. These checks will have been performed by a tenured faculty member of an accredited university veterinary teaching hospital. Any findings will be noted in the CERF check. Choroidal Hypoplasia is not considered a crippling/disabling defect as it will not impair the vision of the dog and will often become impossible to diagnose after the dog matures beyond three months of age. Cases like this are referred to as Go-Normal. While the eye check will appear normal, it is likely the choroidal hypoplasia is still there, it is just no longer visible through the retina.

We have read and received a copy of the CERF examination. Any questions as to its findings are understood and acceptable to the buyer.

The buyer agrees to: Annual veterinary checkups, including heartworm check if needed; to keep all immunizations current according to AVMA Guidelines; to properly administer heartworm preventatives; to provide adequate housing according to State law; to confine the animal in a fenced yard or kennel run and not kept on a chain. Should all these conditions not be met, all guarantees are void.
